About Me

I am a 3D character animator with clear knowledge and working of modelling, texturing and rigging within Autodesk Maya. I also have a keen interest in narrative and the storytelling process to ensure an animation is as believable and entertaining as possible. I am also interested in character design itself, developing a personal style as well as working to other influential designs.

Relevant Work History

June 2009 - October 2009

RJDM Animations

Guilsborough, Northamptonshire

Freelance-hired 3D Generalist, recruited on demand. Worked closely with a small team for an important client-based project. Models were created exactly to scale, rigged and animated in Maya. Textures were modified from supplied artwork in Photoshop.

August 2007

Geoff Haines

Epping Forest, Essex

Website design and maintenance. Design made to suit customer's requirements and preferences, contacted via email frequently. New pages are created and updated myself at regular intervals.

Qualifications

July 2009
